SUMMARY

Front-End Engineer specializing in building scalable, high-performance web applications and microfrontend architectures, serving 10M+ monthly users across 5 international markets. Experienced in leading high-impact projects and integrating complex payment systems for seamless checkout experiences. Skilled in React, Next.js 15, TypeScript, and internationalized user experiences, delivering measurable business results such as 15% increase in SEO traffic and 8% higher payment success rates.

SKILLS

Core Technologies: Next.js 15, React, TypeScript, JavaScript, TailwindCSS, Redux Toolkit, Zustand

Architecture & Specializations: Microfrontend Design, Multi-repository Management, Nginx Reverse Proxy/Routing, Performance Optimization (Core Web Vitals)

Payments & Testing: Juspay PayV3 SDK, PayU Integration, Cypress E2E Testing, CORS Handling, Session Management

Tools: Webpack, Docker, Claude Code, Cursor, AI

EXPERIENCE

Lenskart

Senior Software Engineer – Frontend

Apr 2025 – Present

Gurugram, IN

- **Checkout Microfrontend Architecture:** Reduced deployment conflicts by 40% and accelerated feature release cycles by 2x by architecting a multi-repository Next.js 15 microfrontend with Nginx proxy routing for the checkout flow.
- **Cross-Origin Checkout Integration:** Designed and implemented bidirectional API endpoints enabling seamless cart data transfer between external partners and the checkout microfrontend, incorporating CORS preflight handling and secure session validation.
- **Performance Optimization:** Improved Lighthouse performance scores by 35% and reduced Largest Contentful Paint (LCP) by 1.2s through bundle splitting and SSR, resulting in a 15% increase in organic SEO traffic.
- **International Market Ownership:** Contributed to checkout and payment systems across 5 countries (UAE, KSA, Singapore, Thailand, US), implementing region-specific payment methods, RTL support, and localized validation rules.
- **Apple Pay Integration:** Implemented Apple Pay for international markets in 2 countries (UAE, KSA), enabling seamless express checkout for global users.

Lenskart

Software Engineer – Frontend

Sep 2023 – Mar 2025

Gurugram, IN

- **Payment Gateway Integration:** Increased payment success rates by 8% and reduced checkout drop-off by 12% by leading the migration from PayU to Juspay PayV3 SDK, handling 2M+ monthly transactions.
- **Microfrontend Development:** Built core React components for checkout flows using TypeScript with secure session management across microfrontend boundaries.

Lenskart

Front-End Intern

Sep 2022 – Aug 2023

Gurugram, IN

- **Developed region-specific UI components for 5 markets** with RTL support and localization; built reusable React components for product/cart flows.
- **Quality Assurance:** Achieved high test coverage and reduced UI bugs by 30% through comprehensive Cypress E2E testing.

EDUCATION

Birla Institute of Applied Sciences

B.Tech in Computer Science and Engineering – GPA: 85%

Apr 2019 – Apr 2023

Nainital, IN
